far beyond ordinary

far beyond ordinary

TODAY IS NO ORDINARY DAY

Look around.

Blue skies, wide with potential.

Green fields, full of opportunity.

Nothing is out of bounds.

It's the perfect day to make something perfect,
decide it's not perfect and rework it, until it is.

Perfect.

So much to do.

I will make light, lighter and effort, effortless.

I will make shapes that have never been shaped before.

I will turn wood into graphite, and graphite into gold.

And when I'm done,

I will be pleasantly surprised that I've done it again.

Yes, today is no ordinary day.

Today will be the greatest day of my life's work.

Until, perhaps, tomorrow.

ISOMETRIC™

SIGNATURE YONEX TECHNOLOGY SINCE 1980

7% LARGER SWEET SPOT

Developed over 30 years ago, the ISOMETRIC™ design increases the sweet spot by 7%*. Compared to a conventional round frame, a square-shaped ISOMETRIC™ racquet generates a larger sweet spot by optimizing the intersection of the main and cross strings. ISOMETRIC™ technology delivers greater control without sacrificing power.

ISOMETRIC™ is a trademark of Yonex Co., Ltd.
*Tested by Yonex

OVAL PRESSED SHAFT

O.P.S.
Oval Pressed Shaft

First introduced in 1969 with the T-7000 - our first aluminum tennis racquet - the Oval Pressed Shaft (OPS) is still incorporated into our most popular racquet series today. The Oval Pressed Shaft is designed to give players more spin, control, and feel. The shaft flexes at impact, increasing dwell time and minimizing vibrations.

REVOLUTIONARY GRAPHITE

Staying true to our roots, our graphite is sourced and engineered in Japan, giving our research and development team the opportunity to utilize a wide range of materials that suits players of all levels.

2G-Namd
Flex Force

Aggressive, attacking spin is achieved through a carbon nanotube (CNT) structure that binds the graphite fibers together, which reduces energy loss. Due to its resilient properties, the material flexes and provides quick snapback.

Namd is technology developed by Nitta Co., Ltd. to uniformly disperse carbon nanotubes in carbon fiber composites.

M40X

A high strength, high modulus graphite achieves the rare combination of frame stability and flex through its unique properties.

TORAYCA® M40X is a next-generation carbon fiber developed by Toray Industries, Inc.

VIBRATION DAMPENING MESH

VDM
Vibration Dampening Mesh

First used in our snowboards to reduce vibrations at impact, Vibration Dampening Mesh (VDM) is now used in four of our racquet series. VDM is a stretchy mesh material that is wrapped around the graphite within the grip to filter unwanted vibrations and improve touch and precision.

VCORE

The V-CORE features a toolbox of spin waiting to be unlocked – heavy spin, attacking spin, topspin, backspin, side spin...every type of spin. Think of a fast, red car – speedy, slick, smooth – that's the 6th-generation V-CORE.

New materials combine with innovation to increase string snapback and movement, giving players access to the most spin in Yonex tennis history. Yes, it has even more RPM's than the previous model*, producing trajectories your opponent has never seen before.

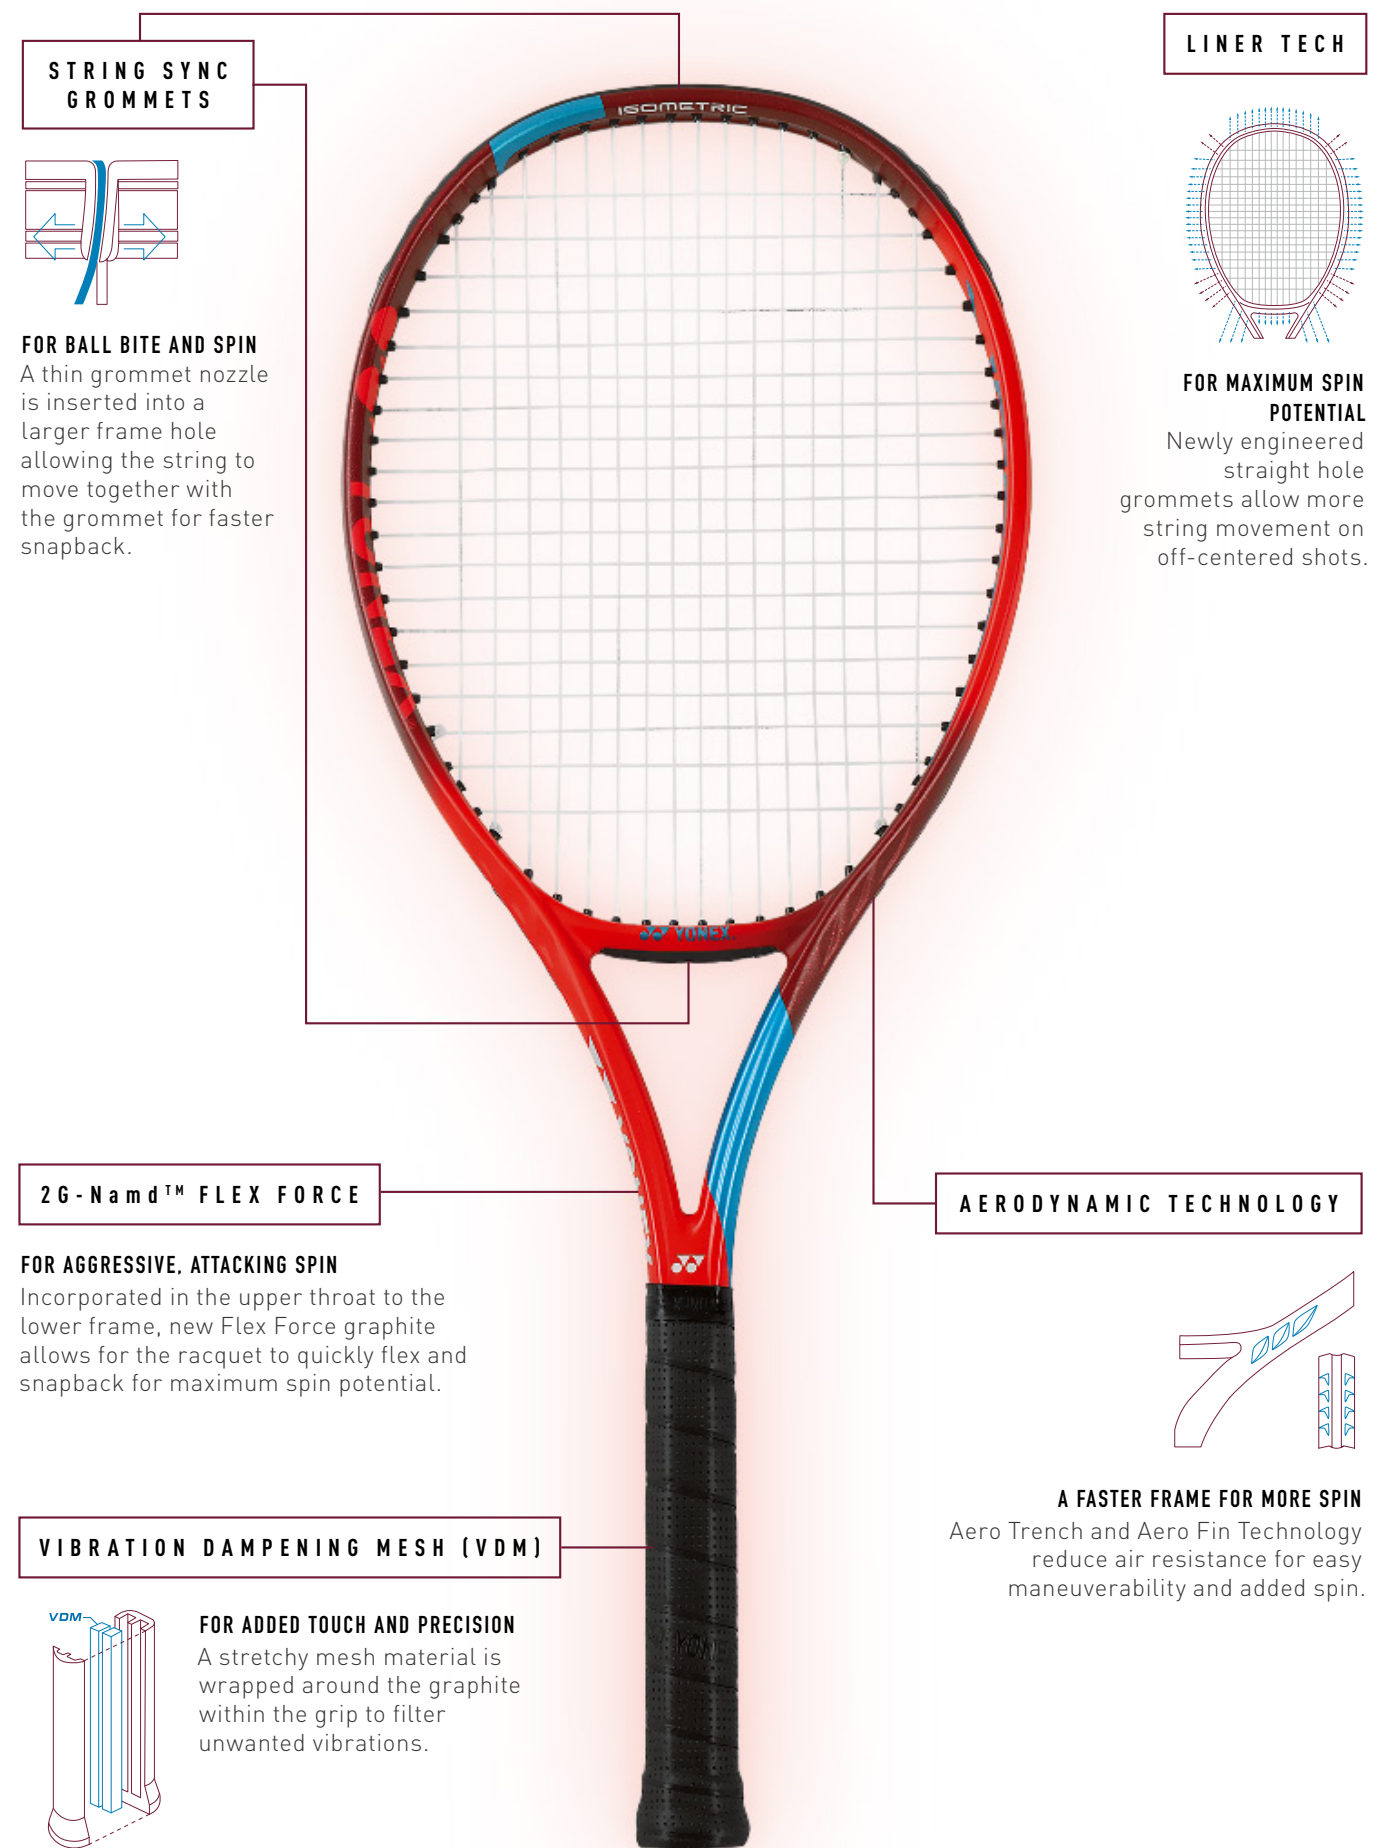

*Compared to the 5th-generation V-CORE. Tested by Yonex.

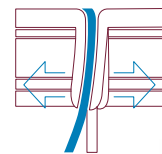

DENIS SHAPOVALOV (CAN)

ANGELIQUE KERBER (GER)

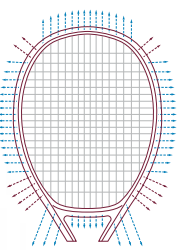

STRING SYNC GROMMETS

FOR BALL BITE AND SPIN

A thin grommet nozzle is inserted into a larger frame hole allowing the string to move together with the grommet for faster snapback.

LINER TECH

FOR MAXIMUM SPIN POTENTIAL

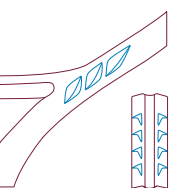

Newly engineered straight hole grommets allow more string movement on off-centered shots.

2G-Namd™ FLEX FORCE

FOR AGGRESSIVE, ATTACKING SPIN

Incorporated in the upper throat to the lower frame, new Flex Force graphite allows for the racquet to quickly flex and snapback for maximum spin potential.

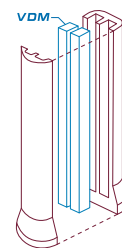

AERODYNAMIC TECHNOLOGY

A FASTER FRAME FOR MORE SPIN

Aero Trench and Aero Fin Technology reduce air resistance for easy maneuverability and added spin.

VIBRATION DAMPENING MESH (VDM)

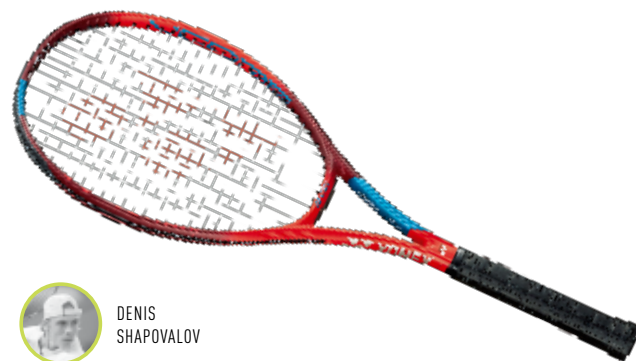

FOR ADDED TOUCH AND PRECISION

A stretchy mesh material is wrapped around the graphite within the grip to filter unwanted vibrations.

STAN WAWRINKA (SUI)

Every fabric is chosen for function. Every pattern has a meaning. Every stitch has a purpose. Every article of clothing is crafted for comfort.

It's technology like VERYCOOL, made with Xylitol-enhanced fabric scientifically proven to keep the body's temperature 3°C cooler, that gives players the ability to feel fresh on the court.

It's carefully chosen fabric that optimizes airflow. It's hydrophobic fibers designed to transfer moisture away from the skin. And it's the ability to intercept infrared radiation to minimize heat buildup during play.

It's this combination – the combination chosen by three-time Grand Slam Champion **Stan Wawrinka** – that is engineered to optimize every movement on the court.

STAN WAWRINKA (SUI)

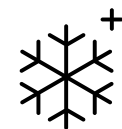

VERYCOOL

A COOL WAY TO BEAT THE HEAT

By using impregnated Xylitol, VERYCOOL clothing absorbs heat and perspiration, providing a significant cooling effect during exercise. No matter what the ambient temperature, VERYCOOL lowers body heat by 3°C for cooler play*.

**Data from Unitika Garments Technology & Research Laboratories Ltd.*

VERYCOOL DRY

KEEP COOL, DRY AND ON TOP OF YOUR GAME

A special hydrophobic fiber moves moisture from the skin to the fabric's surface. Along with its quick drying property, VERYCOOL DRY keeps you cool and dry at all times.

UV REDUCTION

OUTSTANDING ULTRAVIOLET INTERCEPTION

Yonex clothing intercepts infrared radiation and approximately 92%* of ultraviolet, minimizing heat build-up during play.

**Tested by BOKEN QUALITY EVALUATION INSTITUTE.*

ANTISTATIC

AVOID DISCOMFORT OF STATIC ELECTRICITY

Carbon-impregnated conductive fibers are woven into the clothing to remove static electricity build-up.

POWER SLEEVE

EFFORTLESS ARM MOVEMENT WHEN IN ACTION

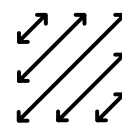

Affording a 165° range of motion in the sleeves, our shirts boast less restriction and free movement.

POLYGIENE

STAY FRESH AND ODOR-FREE

- Keeps clothes and footwear fresh and odor-free.
- Safe for your skin and eco-friendly.

STRETCH

FLEXIBLE, FORGIVING, AND FASHIONABLE

Innovative stretch material allows for free movement that supports your active play.

SWEAT ABSORBENT AND QUICK DRYING

STAY DRY AND LIGHT

Fabric that wicks away moisture and keeps you dry.

FOOTWEAR

Tennis is a game of millimeters, inches, grams, and RPMs. Every little detail matters. From placing our signature POWER CUSHION + technology into the soles, to perfectly positioning asymmetrical laces, our shoes are specifically designed to support your movement on the tennis court.

"Your shoes carry you through those tough five-set matches," said Stan Wawrinka, who won three Grand Slam titles in the ECLIPSION series. "Stability and shock absorption are key in getting you from point to point, and ultimately, to win the match."

GRIPS

The connection between your hand and the racquet is often overlooked but can make the biggest difference.

Yonex designs a range of overgrips to fit every player’s preference. From Super Grap – Yonex’s most popular overgrip that has been sold enough to wrap around the world five times – to Dry Grap, which wicks away moisture and provides a dry feeling even in humid conditions, every Yonex overgrip is designed to make the connection between your hand and your racquet one you can trust.

5X AROUND THE WORLD

Launched in 1987, Yonex’s best-selling overgrip - Super Grap - has sold enough grips to wrap around the world five times. Super Grap (AC102) enhances the playability of your racquet by absorbing shock and moisture to give you outstanding levels of feel and control.
